

DAILY TECHNICAL REPORT

03 November 2015

EUR / USD

Directionless.

- EUR/USD is digesting its recent short-term overextended rise and shifted into consolidation pattern. Breaking above the minor resistance at 1.0989, alleviated short-term concerns stemming from last weeks bearish intra-day correction. Hourly resistance is given at 1.1095 (28/10/2015 reaction high). Stronger resistance can be found at 1.1387 (20/10/2015 low).

- Since March 2015, the pair is improving. Key supports can be found at 1.0458 (16/03/2015 low) and 1.0000 (psychological support). The technical structure favours an eventual break higher. Strong resistance is given at 1.1871(12/01/2015).

GBP / USD

Bouncing nowhere.

- GBP/USD bullish rally has paused but watch initial resistance can be found at 1.5529 (18/09/2015 high). The short-term technical structure suggests continued bullish momentum. An initial support lies at 1.5404 (02/11/2015) then 1.5202 (06/06/2014 high).
- In the longer term, the technical structure looks like a recovery as long as support given at 1.5089 stands. A full retracement of the 2013-2014 rise is expected.

USD / JPY

Back into middle of range.

- USD/JPY continues to move within its range after failing to challenge its recent lows at 120.80 (28/10/2015 low). Lack of technical drivers indicate that range trading should continue. Strong resistance is given at 121.75 (28/08/2015 high). Expected to show continued increase before targeting again resistance at 121.75.
- A long-term bullish bias is favored as long as the strong support at 115.57 (16/12/2014 low) holds. A gradual rise towards the major resistance at 135.15 (01/02/2002 high) is favored. A key support can be found at 116.18 (24/08/2015 low).

Peter Rosenstreich | Head of Market Strategy

USD / CHF

Watch declining downtrend.

- USD/CHF continues to struggle to decisively break the declining channel resistance at 0.9880. However, as long as the support at 0.9808 (27/10/2015 low) holds, a break to the upside is favored. Additional hourly support is given at 0.9476 (15/10/2015 low).
- In the long-term, the pair has broken resistance at 0.9448 suggesting the end of the downtrend. This reinstates the bullish trend. Key support can be found 0.8986 (30/01/2015 low).

Peter Rosenstreich | Head of Market Strategy

USD / CAD

Weak bounce

- USD/CAD is still in an upside trend despite current pullback. The pair has failed to shift momentum by holding below support implied by the lower bound of the uptrend channel. Hourly support is given at 1.3056 (30/10/2015 base low). Expected continued bullish momentum of the pair.

- In the longer term, the break of the key resistance at 1.3065 (13/03/2009 high) has indicated increasing buying pressures, which favours further medium-term strengthening. Support can be found at 1.1731 (06/01/2015 low).

AUD / USD

Challenging its key resistance around 0.7226.

- AUD/USD continues to move within its short term uptrend and is now challenging its recent high at 0.7226 (declining downtrend channel). As the pair has broken hourly support at 0.7165 (08/10/2015 low) underlying downside trend is dominate. Key support lies at 0.6893 (04/09/2015 low). Pair expected to show continued weakness.

- In the long-term, there is no sign to suggest the end of the current downtrend. Key supports stand at 0.6009 (31/10/2008 low) . A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view. In addition, we still note that the pair remains well below the 200-dma which confirms selling pressures.

GBP / JPY

Bullish recovery in the uptrend channel.

- GBP/JPY rebound near the key support area at 184.30 (see also the rising channel) is thus far impressive. A break of the resistance at 187.33 (21/09/2015 high) is needed to suggest further short-term strength. Expected to start a downside momentum by breaking support of this uptrend channel.
- In the long-term, the lack of any medium-term bearish reversal pattern favours a bullish bias. The successful test of the strong support at 175.51 (03/02/2015 low) signals persistent buying interest. Key resistances stand at 197.45 (26/09/2008 high). A major support area can be found between 169.51 (11/04/2014 low) and 167.78 (18/03/2014 low).

EUR / JPY

Short-term bullish momentum fading.

- EUR/JPY is bouncing after breaking support at 132.23 (04/09/2015 low). Hourly resistance is located at 137.45 (17/09/2015 high) and hourly support lies at 132.84. Expected to show continued weakness.
- In the longer term, the break of the support at 130.15 validates a medium-term succession of lower highs and lower lows. As a result, the resistance at 149.78 (08/12/2014 high) has likely marked the end of the rise that started in July 2012. Key supports stand at 124.97 (13/06/2013 low) and 118.73 (25/02/2013 low). A key resistance can be found at 141.06 (04/06/2015 high).

Peter Rosenstreich | Head of Market Strategy
 e-mail: Peter.Rosenstreich@swissquote.ch

EUR / GBP

Challenging a support area.

- EUR/GBP is consolidating after sharp decline. The technical structure is negative. Monitor the support area between 0.7145 and 0.7123 (30/10/2015 low). Hourly resistance can be found at 0.7158 (02/11/2015 low). Structural pattern indicates continued weakness.
- In the long-term, prices are in an underlying declining trend. The general oversold conditions suggest a limited medium-term downside potential. A key resistance lies at 0.7592 (03/02/2015 high).

Peter Rosenstreich | Head of Market Strategy
e-mail: Peter.Rosenstreich@swissquote.ch

EUR / CHF

Sideways moves.

- EUR/CHF is riding the downtrend channel. The short-term technical structure remain negative. Hourly support lies at 1.0733 (16/10/2015 low). Hourly resistance can be found at 1.0908 (declining channel resistance). Expected to fall below 1.0800.
- The EUR/CHF is digesting its 15 January sharp decline. A key resistance stands at 1.1002 (02/09/2011 low). The ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).

Peter Rosenstreich | Head of Market Strategy
 e-mail: Peter.Rosenstreich@swissquote.ch

GOLD

Selling pressure continues.

- Gold is moving lower and the short-term technical structure is negative. Short-term supports region can be found at 1134 and 1132. Another support can be located at and 1093 (12/08/2015 low). Hourly resistance is given at 1205 (18/06/2015 high). Expected to show continued weakness.
- In the long-term, the underlying downtrend (see declining channel) continues to favour a bearish bias. Although the key support at 1132 (07/11/2014 low) has been broken, a break of the resistance at 1223 is needed to suggest something more than a temporary rebound. A major support can be found at 1045 (05/02/2010 low).

Peter Rosenstreich | Head of Market Strategy
 e-mail: Peter.Rosenstreich@swissquote.ch

SILVER (in USD)

Monitor the support at 15.30

- Silver is weakening. The potential medium-term base formation and the short-term challenge to range support favour a bearish bias. Hourly support is given at 15.30 (02/11/2015 low). The resistance at 15.47 (declining channel) has thus far held.
- In the long-term, the break of the major support area between 18.64 (30/05/2014 low) and 18.22 (28/06/2013 low) confirms an underlying downtrend. The strong support at 14.66 (05/02/2010 low) has been broken and prices have then consolidated. A key resistance stands at 18.89 (16/09/2014 high).
