GBP / USD

Wide-open to 6 year-lows.

- GBP/USD is weakening and is now trading below 1.4500. Hourly resistance is given at 1.5242 (13/12/2015 high). Stronger resistance can be found at 1.5336 (19/11/2015 high). Expected to show continued weakness.
- The long-term technical pattern is negative and favours a further decline towards the key support at 1.4231 (20/05/2010 low), as long as prices remain below the resistance at 1.5340/64 (04/11/2015 low see also the 200 day moving average). However, the general oversold conditions and the recent pick-up in buying interest pave the way for a rebound.

USD / CAD

Never-ending increase.

- USD/CAD is pushing higher. Hourly support is located far away at 1.3803 (25/12/2015 low) which break would trigger a sharp move to key support at 1.3225 (12/11/2015 low). Expected to show continued increase.
- In the longer term, the break of the key resistance at 1.3065 (13/03/2009 high) has indicated increasing buying pressures, which favours further medium-term strengthening. Strong resistance is given at 1.4948 (21/03/2003 high). Support can be found at 1.2832 (15/10/2015 low) then 1.1731 (06/01/2015 low).

AUD / USD

Fading above support at 0.6896.

- AUD/USD rises. Hourly support can be found at 0.6896 (06/09/2015 low). The technical structure remains clearly negative. Hourly resistance is given at 0.7328 (31/12/2015 high). Expected to monitor support at 0.6896 (06/09/2015 low).

- In the long-term, we are waiting for further signs that the current downtrend is ending. Key supports stand at 0.6009 (31/10/2008 low) . A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view. In addition, we still note that the pair remains well below the 200-dma which confirms selling pressures.

EUR / CHF

Bullish breakout.

- EUR/CHF is trading higher. Hourly support lies at 1.0733 (28/08/2015 low) and hourly resistance at 1.0956 (29/09/2015 high) has been broken. Expected monitoring of the hourly support at 1.0982 (25/09/2015 high).
- In the longer term, the technical structure remains negative as long as prices remain below the resistance at 1.1002 (02/09/2011 low). The ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).

EUR / JPY

Trading sideways.

- EUR/JPY keeps on trading around 128.00. Hourly resistance lies at 134.60 (04/12/2015 high). Stronger resistance is located at 137.45 (17/09/2015 high). The technical structure suggests a further decline toward hourly support at 126.79 (07/01/2016 low).
- In the longer term, the technical structure validates a medium-term succession of lower highs and lower lows. As a result, the resistance at 149.78 (08/12/2014 high) has likely marked the end of the rise that started in July 2012. Key supports stand at 124.97 (13/06/2013 low) and 118.73 (25/02/2013 low). A key resistance can be found at 141.06 (04/06/2015 high).

EUR / GBP

Bullish momentum.

- EUR/GBP is pushing higher. The technical structure suggests that there are still strong buying interests. Hourly resistance lies 0.7555 (11/01/2016 high) and hourly support is given at 0.7350 (25/12/2015 low). Expected to further consolidate before entering into another upside move.
- In the long-term, prices are in an underlying declining trend. The general oversold conditions suggest a limited medium-term downside potential. A key resistance at 0.7592 (03/02/2015 high) is approaching.

GOLD (in USD)

Bearish consolidation.

- Gold is now declining for the third sessions in a row. Strong support area is given by the hourly support at 1046 (03/12/2015 low) and by key support at 1044 (05/02/2015 low). Yet, the short-term technical structure suggests a deeper upside move.
- In the long-term, the underlying downtrend (see declining channel) continues to favour a bearish bias. A break of the resistance at 1223 is needed to suggest something more than a temporary rebound. A major support can be found at 1045 (05/02/2010 low).

SILVER (in USD)

Back to high volatility.

- Silver's breakout seemed to be a wrong signal. Hourly support is given at 13.64 (14/12/2015 low). Hourly resistance at 14.64 (07/12/2015 high) still seems far. The overall technical structure (high volatility) is positive and silver is now expected to keep increasing.
- In the long-term, the break of the major support area between 18.64 (30/05/2014 low) and 18.22 (28/06/2013 low) confirms an underlying downtrend. Strong support can be found at 11.75 (20/04/2009). A key resistance stands at 18.89 (16/09/2014 high).

Crude Oil (in USD)

Testing the 30.00 level.

- Crude oil keeps on declining. Despite the medium-term technical structure remains clearly negative in a context of oil oversupply. Expected to see continued weakness. Oil keeps riding the downtrend channel.
- In the long-term, crude oil has not shown signs of recovery. Strong support lies at 37.75 (24/08/2015) has been broken and 32.40 (18/08/2015 low) is now on target. Nonetheless, crude oil is holding way below its 200-Day Moving Average (setting up at 50). An very unlikely break of the resistance at 60.72 (05/07/2015) would confirm an underlying uptrend.
