Key resistance is located region at 1.1453 (range high) and 1.1640 (11/11/2005 low) is likely to cap any price appreciation. GBP / USD

Lack of follow-through.

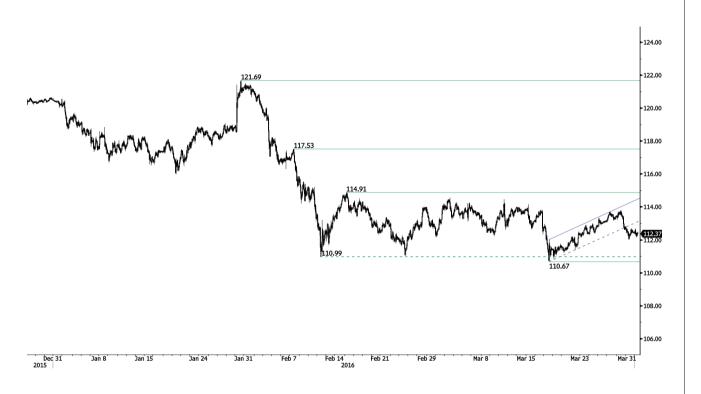

- GBP/USD is back to a range mode despite the medium-term technical structure is clearly bearish. Hourly resistance is given at 1.4591 (05/02/2016 high) while hourly support can be found at 1.4033 (03/03/2016 low). A break of stronger resistance at 1.4668 (04/02/2016) is nonetheless needed to show a reverse in the medium-term momentum.
- The long-term technical pattern is negative and favours a further decline towards key support at 1.3503 (23/01/2009 low), as long as prices remain below the resistance at 1.5340/64 (04/11/2015 low see also the 200 day moving average). However, the general oversold conditions and the recent pick-up in buying interest pave the way for a rebound.

USD / JPY

Consolidating after bearish breakout.

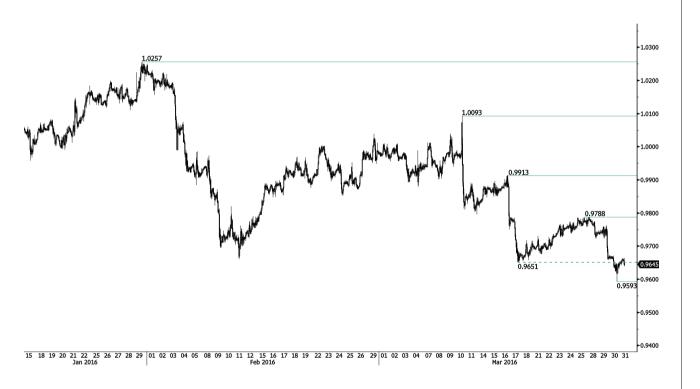

- USD/JPY's medium term momentum is clearly negative. On the short-term, the pair has broken short-term uptrend channel.
