## AUD / USD

### Short-term bearish.

- AUD/USD is still in the downtrend channel. Hourly support at 0.7070 (29/10/2015 low) has been broken, Expected monitoring of the support implied by the lower bound of the downtrend channel.
- In the long-term, there is no sign to suggest the end of the current downtrend. Key supports stand at 0.6009 (31/10/2008 low) . A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view. In addition, we still note that the pair remains well below the 200-dma which confirms selling pressures.

## GBP / JPY

- In the long-term, the lack of any medium-term bearish reversal pattern favours a bullish bias. The successful test of the strong support at 175.51 (03/02/2015 low) signals persistent buying interest. Key resistances stand at 197.45 (26/09/2008 high). A major support area can be found between 169.51 (11/04/2014 low) and 167.78 (18/03/2014 low).

- In the longer term, the break of the support at 130.15 validates a medium-term succession of lower highs and lower lows. As a result, the resistance at 149.78 (08/12/2014 high) has likely marked the end of the rise that started in July 2012. Key supports stand at 124.97 (13/06/2013 low) and 118.73 (25/02/2013 low). A key resistance can be found at 141.06 (04/06/2015 high).

## EUR / CHF

### Moving sideways.

- EUR/CHF is moving sideways off support, though a bearish bias is favoured given the recent lower highs. Hourly support lies at 1.0733 (28/08/2015 low). Resistance can be found at 1.0908 (declining channel resistance). Expected to monitor 1.0700.

- In the longer term, the technical structure remains negative as long as prices remain below the resistance at 1.1002 (02/09/2011 low). The ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).

**GOLD**

**Bearish momentum.**

- Gold has broken the hourly support at 1093 (03/11/2015 low), and the short-term technical structure is negative. Short-term supports region can be found at 1085 (06/11/2015 low). Hourly resistance is given at 1110 (06/11/2015 high). Expected to show continued weakness.

- In the long-term, the underlying downtrend (see declining channel) continues to favour a bearish bias. Although the key support at 1132 (07/11/2014 low) has been broken, a break of the resistance at 1223 is needed to suggest something more than a temporary rebound. A major support can be found at 1045 (05/02/2010 low).

**SILVER (in USD)**

**Breaking support at 14.94.**

- Silver has broken hourly support at 14.94 (05/11/2015 low). The potential medium-term base formation and the short-term challenge to range support favours a bearish bias. The resistance at 15.45 (declining channel) has thus far held.
- In the long-term, the break of the major support area between 18.64 (30/05/2014 low) and 18.22 (28/06/2013 low) confirms an underlying downtrend. The strong support at 14.66 (05/02/2010 low) has been broken and prices have then consolidated. A key resistance stands at 18.89 (16/09/2014 high).
