GBP / USD

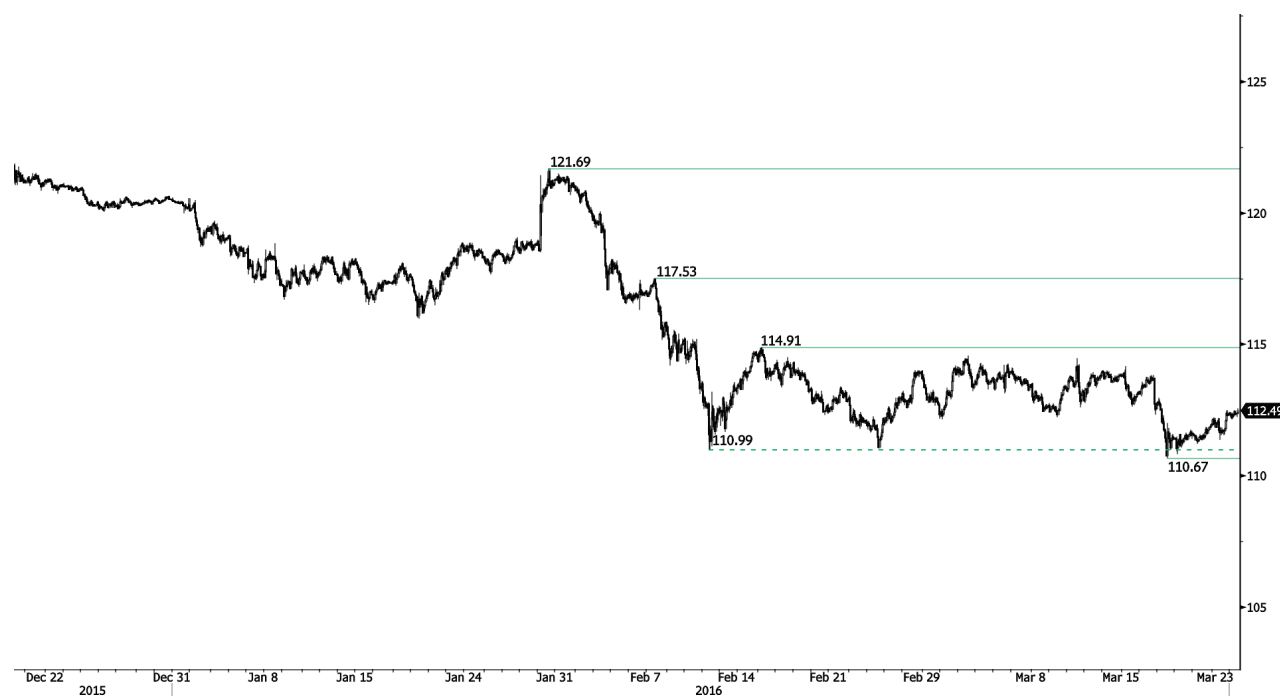

Targeting lower bound of the uptrend channel.

- GBP/USD is weakening despite remaining in short-term bullish momentum. Yet, the medium-term technical is clearly bearish. Hourly resistance is given at 1.4514 (18/03/2016 high) while hourly support can be found around 1.4140 (uptrend channel). A break of strong resistance at 1.4668 (04/02/2016) is needed to show a reverse in the short-term momentum.

- The long-term technical pattern is negative and favours a further decline towards key support at 1.3503 (23/01/2009 low), as long as prices remain below the resistance at 1.5340/64 (04/11/2015 low see also the 200 day moving average). However, the general oversold conditions and the recent pick-up in buying interest pave the way for a rebound.

Strengthening.

- USD/JPY's medium term momentum is clearly negative. Yet, on the short-term, the pair keeps on strengthening. Hourly resistance is given at 112.96 (17/03/2016 high). AUD / USD

Moving sideways inside the uptrend channel.

- AUD/USD keeps on riding the uptrend channel despite ongoing retracement. Strong resistance is given at 0.7680 (18/03/2016 high). Hourly support is given at 0.7415 (16/03/2016 low). Expected to show further consolidation before entering into another upside move.

- In the long-term, we are waiting for further signs that the current downtrend is ending. Key supports stand at 0.6009 (31/10/2008 low). A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view. In addition, we still note that the pair is now above the 200-dma which confirms our view that buying pressures are increasing.

EUR / CHF

Short-term bearish.

- EUR/CHF keeps on declining since it failed to reach 1.1000 which shows that short-term bearish pressures are still lively. Hourly support can be found at 1.0893 (10/03/2016 low) while hourly resistance is given at 1.1023 (10/03/2016 high). Expected to show continued weakness toward 1.0900.

- In the longer term, the technical structure remains positive. Resistance can be found at 1.1200 (04/02/2015 high). Yet, the ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).

EUR / JPY

Bouncing back.

- EUR/JPY is located on a short-term uptrend channel. Hourly resistance can be found at 127.29 (14/03/2016 high). Hourly support is given at 124.68 (intraday low). A break of support implied by the lower bound of the uptrend channel at around 124.75 is necessary to confirm any end of the current short-term bullish trend.

- In the longer term, the technical structure validates a medium-term succession of lower highs and lower lows. As a result, the resistance at 149.78 (08/12/2014 high) has likely marked the end of the rise that started in July 2012. Strong support is given at 118.73 (25/02/2013 low). A key resistance can be found at 141.06 (04/06/2015 high).

- Crude oil's short-term bullish momentum is definitely not ending. Daily resistance is given at 42.00 (04/12/2016 high). Hourly support can be found at 35.96 (15/03/2016 low). The technical structure suggests that buying pressures are important and strong daily resistance at 43.46 (24/11/2016 high) is clearly on target.

- In the long-term, crude oil is on a sharp decline and is of course no showing any signs of recovery. Strong support at 24.82 (13/11/2002) is now on target. Crude oil is holding way below its 200-Day Moving Average (setting up at around 47). There are currently no signs that a reverse trend may happen.
